## PROJECTS

---

### **Project 1 - (Generic Annotation Tool)**

*ReactJs, Tailwind CSS, Java , NodeJs , Express ,and MySQL*

- Developed module handling different type use cases for annotation , Users Management , Login , Dashboard.
- Developed Reusable components
- GCP for deployment, Code base in Git

### **Project 2 - (Console & Data Catalog Tools)**

*ReactJs, NextJs, Tailwind CSS, Java and MySQL*

- Developed single application which show all catalog tools with single login and Permission management
- Developed Notification project shared by across all other applications
- Developed SDK for API's and common components
- GCP for deployment, Code base in Git

### **Project 3 - (Gastryda)**

*ReactJs, Go, Ant Design ,and PostgreSQL*

- Developed multiple module like Users Management , Login , Dashboard and Permission Management
- Utilized responsive design to ensure compatibility across all devices
- Written Unit Test cases
- AWS for deployment, Code base in Git

### **Project 4 - (Opendev)**

*ReactJs, Go, Ant Design and PostgreSQL*

- Developed multiple module like Listing Properties , Users Management , Login , Dashboard
- Utilized responsive design to ensure compatibility across all devices
- Developed Email templates to handle difference serivecs (Outlook, Gmail)
- Cross browser compatibility and old version browser (IE and Firefox)
- Written Unit Test cases
- AWS for deployment, Code base in Git

### **Project 5 - (Clinical Portal)**

*AngularJs, NodeJs ,Express, Bootstrap and Mongo DB*

- Developed multiple feature from frontend to backend and writing business logic in server-side with required database queries.
- Developed custom APIs that can be integrated into the users' apps.
- Bitbucket for deployment

### **Project 6 - (ezzhealth)**

*ReactJs, NodeJs ,Express, Bootstrap, Elasticsearch, and Mongo DB*

- Developed module like Appointment booking, Login
- Written lamada function in AWS
- Improved search query algorithm for better result
- Improved customer satisfaction by 40% by ensuring cross browser compatibility in design
- Provided support with software troubleshooting, reducing helpdesk tickets by 25%
- Bitbucket for deployment
